NO GEOGRID OR TIE-BACKS In Many Applications

THE LIMESTONE TEXTURE

The Challenge

Need to make a bold statement? Redi-Rock Limestone texture creates an ideal look for projects that require a structural retaining wall that looks good. The massive, one-ton Limestone texture blocks feature six sq. ft. of face on each block, giving walls an impressive finished appearance.

The Solution

Redi-Rock's Limestone face has been a mainstay in the large block retaining wall industry since it was introduced. The texture on each block gives walls the "Essence of Natural Rock" look and is consistently chosen for projects where aesthetics are important. Because Redi-Rock is made of wet cast concrete rather than dry cast concrete, the blocks are cast in molds taken from actual quarried limestone.

Structurally, Redi-Rock Limestone blocks are the same as Redi-Rock blocks you have worked with in the past—the same massive dimensions, quality and ease of installation you've come to expect. At one ton each, you can build tall gravity walls using Redi-Rock Limestone blocks, and even taller walls with reinforcement.

Contact your local Redi-Rock manufacturer or visit www.redi-rock.com to learn more about the Redi-Rock Limestone face today!

MIDDLE BLOCK:
Weight: 2400 lbs.
46" x 41" x 18" High
5.75 sq. ft. of face
